ÆS VISION

People are our business and our business are people.

Integrity and Fairness are key building stones, not only in our everyday business relationships with our clients but also with our management and staff.

Trust ÆS as your
UAE specialists in scaffolding solutions

ABOUT THE COMPANY

ÆS was established in September 2012. Operating across the Middle East from our offices based in Dubai, we serve an international clientele providing them with a host of services related to the events and construction scaffolding industry.

ÆS was born to meet the needs of existing clientele, and exceed the expectations of future clients and regional demands. With more than 14 years experience we provide a comprehensive, high quality scaffolding program at a competitive rate in both construction and event industries.

We aim to provide an unmatched service from inception to completion to create balanced projects to stand as monumental testimony of our Corporate Policy. We work hand in glove with a number of international suppliers to ensure the Middle East is provided with the highest quality technological advanced products while operating in such a dynamic and competitive market.

Quality Scaffolding services guaranteed

AES is a company that believes in setting the standards, our scaffolders are CITB & CISRS certified and can be hired on a short or long term basis.

We can offer you a 24 hour call out service, the supply of traditional tube and fitting, system access scaffold solution's, we also provide Containment solutions (Event-wrap).

Whether you require scaffolding erection or a completely managed service, we are the company for you.

Masdar City - Brookfield Multiplex

Emirates Training Academy

Types of Scaffolding AES provide

- Commercial Scaffolding
- Domestic Scaffolding
- Facade Scaffolding
- Independant Scaffolding
- Industrial Scaffolding
- Offshore & Marine Access
- Temporary Roof System
 - System Scaffold
- Heras / Barrier fencing

Peri Up LGS System

The LGS Lattice Girder System offers safe and efficient solutions for large spans and/or high loads.

Fast assembly

Ledgers and diagonals can be connected to form very stable units

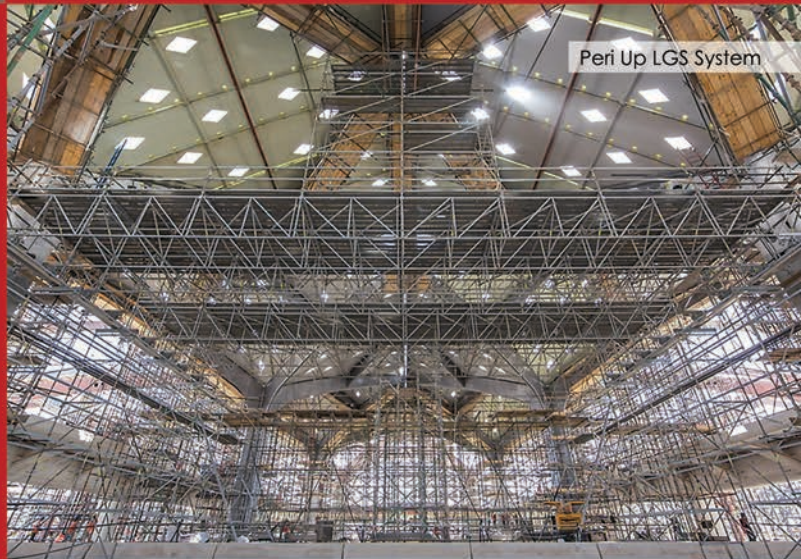

For large spans

The high bending loading capacity allows large spans to be realized

Versatile

Flexibly adaptable to suit different geometries – as a platform or bridge

Peri Up LGS System

Safety Barriers

Safety First

AES are fully committed in providing innovative scaffolding solutions, by creatively utilizing space in a safe and cost effective manner.

We comply with international standards and deliver high quality services with the highest safety standards to our clients.

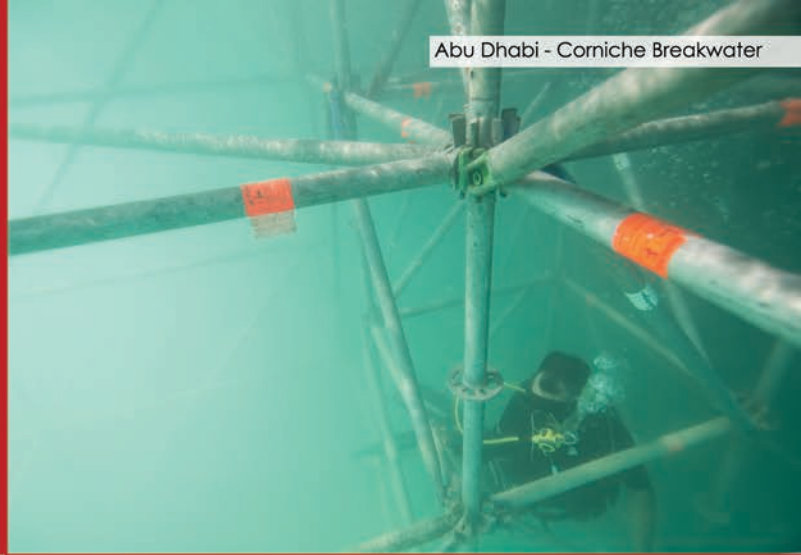

At AES we encourage continuous improvement on health and safety at all levels by complying with regulatory and international standards.

Marine Scaffolding

Abu Dhabi - Corniche Breakwater

AES has extensive experience in providing marine scaffolding through out the Middle East Region. Specialising in the following:

- Oil & Gas Sector
- Offshore Industry
- Power
- Marine Industry
- Bridges

Masdar City

Masdar City Brookfield Multiplex

AES provided the commercial access scaffolding for the facade work of the new buildings in Masdar City. Our scaffolding provides multiple access points for both work crews and material, designed for use in the construction of a wide range buildings, industrial facilities, and civil works. Our working platforms are adaptable to any façade geometry.

Pearl Dive Pool Brookfield Multiplex

AES used the LGS/ Peri-UP scaffold system to provide access for the installation of the Pearl Dive Pool Bubble.

The application for this complex project required bespoke engineering designs due to the unique geometry of the site and the load capacities needed. The system was set on tracks that allowed the project to be quick, cost efficient and safe.

Pearl Dive Pool - Dubai

The Opus Building

The Opus Building Brookfield Multiplex

The AES team designed a bespoke suspended access scaffolding system for the Opus Building.

The building, designed by the world-famous architect Dame Zaha Hadid, required a full engineering and calculations package, to design a glazed link between tower A and tower B.

Our Hard Working Team

We are a small, connected team where each individual is valued and trusted, based on their years of experience within the field. This enables timely decision making, effective communication between all members and creating a sense of intimacy between the clients and team members. At AES we do strive to create lasting relationships, rather than one-off acquaintances. We ensure that we listen to our client's requirements, allowing us to design a personal and bespoke solution to suit their needs. This personal service is why AES offers the best scaffolding solutions in the UAE.
